Valeo

**Smart Villages Company,
F22, KM 28, Al Giza Desert, Giza**

Dear Careers Engineering Team,

I am excited to apply for Junior Test Engineer position on your team. I am a Passionate Quality Engineer dedicated to all aspects about quality field including manual testing, automation testing, Performance testing, API testing. I would love to work for Valeo and contribute to the mission of democratizing education by creating an online experience that can inspire a wider audience.

During my 3 years as quality engineer , I work on 5 projects with different business domains and create 10% of test scenarios that cover business requirements from all aspects using XRAY, report 20% of all defects logged on Jira management tool and create automation projects to improve test cycle using Selenium Java and TestNG also create performance scripts for E2E test scenarios using JMeter and API testing for endpoints used in each project using Postman. This experience kindled my passion for critical thinking and taught me to always keep the user experience and interaction in mind.

To gain more experience in quality field, I complete Udacity's Backend testing Nanodegree program, which has taught me Java Programming Essentials , Advanced Java Topics , Database Fundamentals , API automation testing , Mobile testing , ISTQB Mobile Application testing , ISTQB Advanced Test Analyst. More recently, I completed a freelancer project where I improve my testing skills and self-manage of tasks.

I hope to bring to Valeo my perspective as a quality engineer with a development background and my adaptability and diligence as a career-changer; I am available to meet in person in smart village. I look forward to speaking with you to further discuss my qualifications. Thank you for your consideration.

Best Regards,

Shady Ahmed
